

DORMITORY-STYLE STORAGE UNIT 2013 – COMPLIANCE CERTIFICATION

A dormitory-style storage unit is a combined freezer and refrigerator where the freezer is housed inside the refrigerator and both are accessed by one external door.

Dormitory-style storage unit

The Centers for Disease Control and Prevention (CDC) and the Montana Immunization Program prohibit the use of dormitory-style storage units for any type of VFC vaccine storage.

Montana VFC Providers must certify that they do not use dormitory-style storage units for VFC vaccine prior to re-enrolling in the VFC Program for 2013.

Please read, complete, and then fax the following certification form to the Immunization Program (444-2920) by January 31, 2013. After that time, providers will be inactivated from the program until their certification form has been submitted.

DORMITORY-STYLE STORAGE UNIT COMPLIANCE CERTIFICATION

I understand the definition of a dormitory-style storage unit and that these units cannot be used to store VFC vaccine. I also understand that if found to be storing VFC vaccine in a dormitory-style storage unit our facility will be immediately inactivated from the VFC Program until the unit can be replaced and may be required to reimburse the cost of the vaccine stored in the dormitory-style unit.

Facility Name _____ VFC # _____

does not use dormitory-style storage units to store VFC vaccine.
